

Please do not allow radio stations and their owners to stifle the development and use of new technologies in order to secure effective monopolies. I live in an area where the choice of radio stations is very limited and coverage of news is extremely poor. I prefer to listen to Jazz and Classical stations, and there are none and one of these, respectively, allowing no real choice at all. Please do not allow the restriction of communication and free speech simply because radio station owners are not willing to update their services to meet the desires of the public.

Thank you,

Patton Browne
